

HOST HANDOUT # 7

Getting to know Wikicamps

Youcamp is not affiliated with Wikicamps. We encourage you to get to know how the Wikicamps app works and use it to generate bookings via Youcamp.

Wikicamps is an app that users purchase. The content in the app is generated from users within the Wikicamps community.

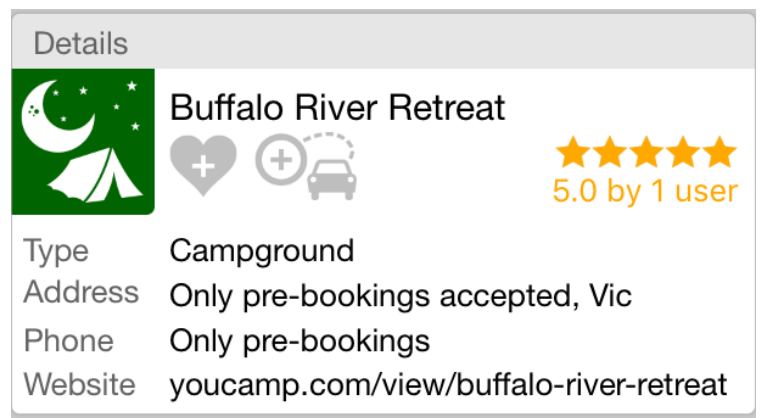

Anyone who has purchased the app, at any time, can add or edit campground information in the Wikicamps directory (without the property owner's permission). Users can add campground location, address, phone number, comments, prices and photos.

We recommend you create your own Wikicamps listing (otherwise chances are someone from the Wikicamps community will do it without your input). You need to download the app onto your phone and create a directory listing.

We recommend you DO NOT list any contact details besides your Youcamp URL (a URL is your Youcamp website link and looks like this <https://youcamp.com/view/milo-downs>). There is a Youcamp icon you can select that indicates you are a Youcamp property and in the address and phone number fields we recommend indicating "Only pre-bookings accepted".

We recommend you add a comment such as "Our property is now open to campers but all bookings must be made in advance via the Youcamp website". Wikicamps travellers are known to make last minute bookings when they are on the road, or just turn up (if your address is given).

Check your Wikicamps listing regularly to ensure another user hasn't updated your address and phone number. It is possible to remove a listing from Wikicamps, please contact us for details.
